

# INTCOEX

## OUR MISSION

Our mission is summarized below:

- Intcoex is crafted to act as a decentralized exchange that is meant to make trading a stress-free experience for traders.
- Intcoex is interested in providing a top customer support that is available every second and very knowledgeable about Intcoex.
- Intcoex's mission is to allow traders trade without fear of losing their coins due to negligence or hardware failure.
- Intcoex's mission is to ensure that users are able to trade very fast without fear that their funds will get stuck.
- Intcoex knows that anonymity, safety, and privacy are key, and that makes them Intcoex's key missions.

## PROCESS OF ITX USAGE

## OUR VISION

Cryptocurrencies started with the creation of Bitcoin by Satoshi in 2008. Since then a lot of cryptocurrencies have existed.

As a lot of cryptocurrencies have continued to be created, there is the need for an exchange and trading platform where users and holders of the cryptocurrencies can transact businesses.

Crypto exchanges, a lot of them, exist that allow for the exchange of cryptocurrencies but a lot of them are plagued with issues, especially the Centralized exchanges. Those exchanges force users to release their coins from their wallet to the centralized account. There is nothing like privacy or anonymity in the system. Those exchanges are prone to hack and other attacks because of their centralized feature.

The decentralized platforms solve these problems, but some of the decentralized platforms have failed for a lot of reasons.

That's why Intcoex has decided to build on decentralized blockchain to create an exchange that surmounts the problems of both existing centralized and decentralized exchanges.

## BLOCKCHAIN TECHNOLOGY SIGNIFICANTLY LOWERS COSTS TO PARTICIPANTS

- Owners of Fin-Coins will have all the privileges of other crypto currencies plus the profits of intcoex.io exchange**
- Companies listing on intcoex.io exchange will be able to get to global target while at a substantially reduced initial and ongoing cost, while still harnessing all the skills, competencies and experience of a traditional investment bank**
- Transparent distribution of fresh matters based on price and demand, not going-on behind the doors**
- To bring connections to the gap to legacy systems and institutions**

## ROAD MAP

## ICO INFORMATION

### PRE-ICO

1st June 1st to 30th	\$0.3
2nd July 1st to 31st	\$0.35
3rd Aug 1st to 31st	\$0.4
4th Sept 1st to 30th	\$0.45

### ICO - Oct 1st

### TOKENOMICS

Token produced:	2 Billion
Type of Token:	ERC-20
Blockchain:	Ethereum
Accepting:	ETH, BTC, Fiat
Ticker:	ITX
